12, No. 138

Thursday, April 28, 1960

Provo, Utah

PULAR PARADISE—"The Mystery Green Mansions" has been chosen as theme of the Jr. Prom assembly today. Participants in the show include (r) Lynn Pouter, Army lieutenant;

Dot Nielsen, Wac (Army) lieutenant; Joe Merim, Army private; Yosh Miya, the Old Man; Tuan Nguyen, oriental girl and Mickey Halliday, Moring, the queen of the "Green Mansions."

Assembly Will Show Island Utopia

Mystery of the Green Mansions," the 1960 Junior Prom, will be the student assembly Friday in the fieldhouse to play a musical-comedy with new music from top

hit Key will present its trophy at the assembly Friday to the women's unit with the highest point average for winter

ter.

away hits and a cast of 80, a script, which was written fair Bybee, author of the Week assembly, "Swingin' Star," and the traveling assembly, "Coney Island Kids," of three ship-wrecked

can who are tricked into

staying on an island that everyone would call a perfect Utopia.

"THE MYSTERY of the Green Mansions" is sponsored by the junior class in conjunction with the Junior Prom and will feature music from Rodgers and Hammerstein's "Cinderella," "The Flower Drum Song," "Other musical numbers in the comedy are from "The Westside Story," "My Fair Lady," and "Peter Pan."

DOT NIELSEN, Lynn Pouter, and Joe Merim play the leading roles as the three Americans. Tuan Nguyen plays the Oriental island girl. Yosh Miya is the old man, and Mickey Halliday portrays the queen of the island.

Sets for the original story were

designed by Stuart Bay and will be a preview of the dance decorations.

Koreans Cheer As Rhee Rides To Private Life

SEOUl, April 26—(UPI)—Ex-President Syngman Rhee left South Korea's "white house" today for what may be the last time and rode through wild cheering crowds to his own home to begin life as a private citizen.

The 85-year-old Korean leader has vowed that he would walk the two-mile distance to disprove foreign press reports that he dared to venture into the streets, but he rode with his wife in a black limousine.

THE CAR was slowed almost to a walking pace by the dense crowds that lined the route, cheering, crying or waving banners bearing such slogans as "We love you, President!"

In the words of U. S. Ambassador Walter P. McConaughy, Rhee left the Kyung Mu-Dae (Presidential mansion) "as a great man should, as the father of his country."

THE WILDCACCISM may have caused the most violent row of the weeks of bloodshed that culminated today in the death of Rhee's right-hand man.

The ex-President was known to have been deeply affected by the post-election riots which took a toll of at least 162 Koreans killed and nearly 1,000 wounded and eventually forced him out of office.

Some presidential sources said Rhee had eaten nothing since April 18, when bloody riots in Seoul were most violent, and the riots left at least 10 persons dead in the streets of Seoul. Other sources said he had taken a "little nourishment" to preserve his strength.

Moving Days Commence As Wymounters Leave To Aid Growth Problem

Y Starts Massive Operation to Insure University's Fast Future Development

Residents of Wymount buildings B-1 through B-6 have been instructed they will have to move to make way for a massive building program already underway at Brigham Young University.

Reliable sources informed Wymount dwellers of a colossal building program of the Church of Jesus Christ of Latter-day Saints that will cover the next 10 years and cost in excess of \$88 million.

Sources indicated that the proposed highway will run from between the new Snell Ind. Ed. Bldg. and the BYU Dairy, below the brow of the hill where the temporary office buildings are now situated, to circle west through Dorm D-7 to connect with the road west of Heritage Halls, which carries the traffic from Twelfth North and Helaman Halls.

Jeppson Gets Post As Director

Ernest Jeppson has been appointed director of the Technical Institute in the General College, President Ernest L. Wilkinson has announced.

Jeppson has taught industrial education at Moapa Valley High School in Overton, Nev.; Carbon County High School in Price; Branch Agricultural College at Cedar City; and State University, the Church College of Hawaii and the Public Instruction Dept. in Honolulu.

HE HAS also been special representative of the Office of Coordinator of Inter-American Affairs in Panama; education chief of the Institute of Inter-American Affairs; and director of Technical Cooperation Administration in Washington, D. C. He also worked with the Organization for European Economic Cooperation in Paris and the Department of Public Instruction in Manila.

Jeppson, who received his B.S. degree in 1928 at Utah State University and the M.S. degree in 1938 at Colorado State University, will head a department designed primarily to help fill the need for technicians in the Intermountain West.

DR. WALTER Hales, dean of the General College, said technicians are in great demand, especially as assistants to engineers. "The shortage is drastic not only in Utah but throughout the nation," Dr. Hales reported.

In the Technical Institute two-year technical training is offered in agriculture, business and civil.

AMONG PLANS now well past the drawing stage are the 460 married student housing units to be constructed north of Heritage Halls. The brick structures are scheduled to be started in the fall of 1961 and ready for occupancy the following year.

The area of the present Wymount Village will become part of a parking area that will sweep east to Ninth East and north to the new married housing units.

THE TOB'S and the Speech Center are slated to be razed at the end of spring quarter to provide building areas for the student center and the new dormitory (where TOB's presently stand) and a fine arts building (planned for the Speech Center area). Cost is estimated at over \$6 million each, and construction will take two years. Construction is planned to commence the fall of 1961.

THE STUDENT center is the largest proposed building for the campus. It will have two major entrances—one atop the hill and the other at the base where the recreational area of the center will be located.

Fred Schwendiman, director of housing at BYU, refused to comment further on the building program, stating that available information would be released through the BYU News Bureau's later issue. All current information was to inform only those who would be affected by immediate construction preparations.

WYOUNT occupants were told that they must be out of all B-buildings by June 20. The highway, which will provide a main thoroughfare for campus traffic, will be completed in the fall. The administration of B-1 through B-4, B-5 and B-6 will be evacuated to accommodate the administration's increasing need for office space.

END OF AN ERA—This old B-Wymount building has seen its last couple come and go—it has been vacated and is being torn down to make way for new buildings and roads. All six B-buildings and the Speech Center will be cleared away soon, reports say.

Stutz, Y Botanist, Wins Guggenheim Fellowship

Or. Howard C. Stutz, assistant professor of botany, has awarded an \$8,000 Guggenheim Fellowship Award to the origin of cultivated rice.

Dr. Stutz will travel to Istanbul, Turkey, early in June where he will commence his studies. His research will be conducted throughout Turkey, northern Iran, and Transcaucasia, and to use the laboratory facilities at Hebrew University of Jerusalem.

GUGGENHEIM Fellowships totalling \$1,400,000 have made this year to 303 scholars and artists. This is the annual series of awards made by the Foundation which was established in 1925 by the late United States Senator Colorado, Simon Guggenheim, and his wife in memory who died as a young man.

The Foundation's Fellowships are granted to persons of highest capacity for scholarly research, demonstrated by previous publication of contributions to knowledge, and distinguished teaching and proven ability in the fine arts.

THE AWARDS are designed to assist the fellows to add themselves to higher levels of accomplishment in their through carrying on the studies for which the fellow is awarded.

Dr. Stutz received the B.S. and M.S. degrees from Brigham Young University and the Ph.D. from the University of Oregon in 1956.

PRIOR TO coming to BYU in 1953, he taught high school and served as principal in Duchesne and was chairman of the Biology Dept. at Snow College.

Smorgasbord Anyone?

Post Sputnik criticism of the U. S. education system has been vociferous and varied. Critics have found fault with everything from kindergarten milk programs to fringe benefits paid to elementary school janitors. Much of the criticism has been valid, some has been unrealistic and some completely worthless.

One particularly significant voice on U. S. higher education's troubles belongs to Robert M. Hutchins, former chancellor of the University of Chicago. Dr. Hutchins sounds a warning that U. S. universities have become "enormous agglomerate service stations," in an article in the May issue of *McCall's Magazine*.

In the McCall's article, Dr. Hutchins charges that U. S. universities are trying to be all things to all people. He cites university catalogues as evidence for this charge. These catalogues, he says, offer everything from "hope chest" courses for freshman and sophomore women to courses in embalming and mortuary management.

He says that U. S. universities are just so many little white lambs blindly following the tinkling bell of conformity because they are afraid to be different. Success among college presidents is measured, he says, by how many fat endowments they can snag, how many buildings they add and how many more students they can cram into classrooms than their predecessors.

At first glance it would appear that Brigham Young University is one of those little white lambs. The BYU catalogue offers courses in beginning canoeing and creative play in childhood. The president of this institution, Dr. Ernest L. Wilkinson, came to BYU after a successful law career in which he won a case involving the largest cash settlement ever awarded by the U. S. government. BYU is immersed in a vast "destiny" program of expansion, and the money, as Dr. Hutchins deprecatingly implies, "is rolling in."

If one accepts Dr. Hutchins' premise that it is bad for U. S. universities to offer a wide variety of courses in their curriculum, then his evidence is overwhelming.

But before we accept this premise we must decide the purpose of education. Dr. Hutchins advocates the elimination of all courses which do not teach persons to "think." Under his plan whole departments would be eliminated and fifty percent of the students now attending universities would be dropped.

What would happen if we followed this plan? Would he suggest that we create an intellectual aristocracy which would relegate the "uneducated untouchables" to the outer fringes of social acceptance?

What would these selected intellectuals do after they learned to "think"? They would still have to eat, sleep, wear clothing, ride in vehicles and participate in other such mundane activities. Someone would still have to clean their shoes and plan their train and airline schedules.

We submit that in this highly technical age college trained personnel are needed in all walks of life and all levels of society.

This so called "motley and mongrelized" educational system has produced the greatest wealth, the most abundant life this world has ever known. We would suggest that the physical education major who can teach someone how to stay healthy and keep trim is making a contribution to society even if he can't discuss socio-cultural aspects of the Ming Dynasty.

We say that a food and nutrition major who can manage a large industrial plant cafeteria efficiently, makes a contribution to society even if she can't tell you the difference between communism and indeterminism.

There is certainly a need for Americans to learn to think, but we would suggest that anything all but a select few chance to enter our colleges and universities, isn't the way to teach it. One has to think to be a plumber or a department store manager.

When people who aren't going to become "intellectuals" have a chance to attend college they come to know at least a little about the theories and ideas in which the world is immersed.

It is true that there is deplorable laxity in U. S. universities. What universities should do is tighten up the standards and requirements on all levels of the curriculum. They should make the classes they offer teach what they are supposed to teach and extract from the students the effort necessary to assure adequate comprehension and retention.

The key is not reducing the kinds of classes to a bare minimum, but rather making the classes that are taught more meaningful.

In the meantime we suggest that colleges and universities keep welcoming Joe Brown and Mary Smith from Anytown, U.S.A. We say make them work hard, and make them produce, but keep the curriculum varied enough to insure that this country won't wake up and find itself overpopulated with "eggheads" who can discuss existentialism but don't know the difference between a car's radiator and its gas tank.

Y's Traffic

Ticket Thieves

Students who pull tickets off of illegally parked cars and throw them away are costing the owners of these cars many unnecessary dollars, said Capt. Leonard Christensen of the Security Dept. of the University.

Apparently, thinking individuals take tickets from windshields of parked cars thinking they are doing the owners a favor. They fail to realize, however, that traffic tickets are made to encourage drivers.

If the one giving to the violator is thrown away, the other two remain on permanent record in the Security Dept. and the individual is held responsible for them. Students who fail to pay parking tickets within three days after receiving them are given an additional fine for being late.

Ticket stealers, he said, obviously do not do their victims a favor but a great injustice by causing them loss of money and inconvenience.

Parking Areas

Capt. Leonard Christensen of the Security Dept. today announced that the parking areas along the road and around and situated immediately east of the Cannon Center has been declared a "no parking" area except the space provided for loading purposes.

The yellow zones will be for passenger loading and unloading while the red areas designate "no parking anytime."

Lecturer Cancels Uranium Address

Brigham Young University executive lectures were scheduled for 270 Firing Science Center Thursday from 5:30 to 8:30 p.m. has been cancelled.

FLOYD B. ODLUM, chairman of the board and chief executive of the Atlas Corp. of New York City, was scheduled to speak on "Uranium: its bearing on the standard of living."

The next in the series of executive lectures will be May 5, according to Weldon J. Taylor, dean of the College of Business

Committee Seeks Rep From Students on Oa

by Duane Larsen
Written for the Universe

As a member of the National Student's Association student body of this university has been requested by organization to join with it in taking a stand on many national issues.

The GREATER Community Committee of the NSA has been delegated the responsibility of selecting issues which they feel most pertinent to bring before studentbody and Senate.

However, this committee is aware that its one may not be truly representative of the studentbody. In this reason they have selected a typical issue that is recently before the committee to ask student consideration and reaction.

ENCOURAGEMENT has come from the NSA to try to influence congressmen to support a bill that would repeal the disclaimer affidavit from the loyalty oath vision of the National Defense Education Act.

Brigham Young University does not participate in NDEA funds, not because of the loyalty disclaimer, but on the grounds that the Board of Trustees feels the cost of education should be met by individual effort church participation. Government subsidies could lead to government control, the board has stated.

NEVERTHELESS, members of NSA and as citizens in it is important that students learn the details involved in the loyalty oath question.

Basically the loyalty provision of the NDEA requires all applicants for a loan to sign (1) an oath of affirming allegiance to the United States (2) an affidavit (disclaimer) stating they do not believe in, support, or belong to any divisive organizations advocating the overthrow of the government.

Affidavit is to oath on trial, only the disclaimer is on trial. This is to part that the committee wishes to attention. This same bill was introduced in Congress in 1959 but was returned to committee. Whether or not re-introduced depends on public interest and sentiment.

Factions Favor Groups Opp Repeal of Oath Repeal of Oa

We should repeal the affidavit because:

1. The affidavit can not be enforced. No provisions have been made to determine who holds the affidavit, its validity of the affidavit, what constitutes the belief of an organization, and under what circumstances a method or overthrowing the government is illegal.

2. The affidavit will not stop a subversive student from receiving a loan but it might keep out one who resents the requirement. A student secretly advocating or believing in the overthrow of this government will take out a loan and not tell anyone knowing these beliefs.

A conscientious student will find it inconsistent with his ideals because he is overapprehensive in the affidavit's interpretation. It is possible to test oaths and believe that there should be freedom of thought and freedom of belief.

3. Such an affidavit is both superfluous and discriminatory said Senator Kennedy. It is an unnecessary imposition burden upon our educational institutions to interpret the section, for each school may have a different concept of what is necessary to prove a belief in an organization. The affidavit is overreaching the power of the U. S. Government by unconstitutional methods" Senator Kennedy added that the affidavit "raises serious constitutional questions concerning its validity, for it seems to cover a concept that belief as opposed to overt action may be a basis for sanctions... and it creates grave problems of Federal control over the educational process."

4. THE suppression of this provision in the first trial operation, 1,227 institutions higher learning have received the NDEA, but of these only 100 have declined loans because the affidavit and 83 others tested on the same grounds though accepting the loans.

Also, the affidavit will not stop a subversive student from receiving a loan. In the first year of operation, virtually no student educators notified the gressresser of their displease with the act.

Student Questionnaire

After reading the arguments in favor of and the arguments opposing repeal of the disclaimer affidavit mark your opinion in the spaces below, tear out the application put it in the box provided in campus buildings.

- Do you feel that the loyalty oath affidavit should be repealed. YES NO
- Do you feel that BYU should take a strong stand on the issue in NSA? YES NO

BUSY BUCKET—Bucket 35 and the whitewashers that passed it got a real workout.

ACTIVITY GALORE—The whitewash line had to work in the drizzle (see above), and East cheered West along in the work (right). The reward was food — free — (below) and water-fight entertainment (bottom center).

Spirit of the 'Y'

WORKERS—Provo and BYU got all slicked up Wednesday.

GAME TIME—The varsity players got crushed by the alumni team, and the girls who played afternoon games didn't fare too well either.

bone, hundreds of tired, beat, painted University students and faculty after food and entertainment.

It did not dampen the enthusiasm of the chomp, chomp of students devouring burritos and ice cream. The sound of grinding teeth could be heard all over, according to doubtful sources.

Laughter for the tired students after the audience was divided into groups and Orange Orangutans and others with other

acts, which resulted in scrambled eggs and a race which caused many fractures and cart race which produced soreness, provided many laughs for the on- and several sets of tug of war competi-

tion between Vikings and Athenians. Around the first turn a Viking hit a player by several stampeding feet and a player was removed from his pony body. After the hit, the race was resumed.

Many students went to recreational city-alumni game and watched the race for a rained-out dance everything else. There were a few minor injuries; and 20 checking in for twisted legs, other assorted injuries.

Talent-Heavy Alums Trip Cougars

Soph-Laden Cats Bow to Grads 21-0 in Soggy Spring Drill Finale

by Don Roberts
University Sports Editor

Unleashing a seemingly never-ending array of grid talent, BYU's Alumni squad trounced a sophomore-laden Cougar varsity last night 21-0 before 1,500 wet fans in the BYU Stadium.

ONLY FOUR timely interceptions by the varsity defense kept the Cougars from running the score even higher. Despite the interceptions, the grad quarterbacks managed to hit seven of 14 attempts on the rain-soaked turf.

Experience told the tale, though, as the hard-charging Alum forward-wall stopped the Cougar backs before a real goal line assault could be made.

The once-promising threat the Cats managed to muster came by way of the forward pass with Bud Belnap hitting left half Bruce Samples with a 42-yard serial on the Alumni 10.

BUT THREE incompletely passes at that point and a screen pass play couldn't push the Pumas in for the score.

The Cat signal callers hit only three of 11 passes. Without improvement, the Cougars felt it doubtful they'll be able to kick off opposing defenses honest.

A truck load of hard-running backs hit the peak of their strength in the annual effort last night. Led by two former All-Confession selections, Dick Felt and Nyle McFarlane, the grade ate up the ground yardage.

After a scoreless first quarter, the Alumni eleven finally got their offense clicking for their

Comeback Puts Pair In Spotlight

by Fred Down
United Press International

Go so far north than Vern Law's 1,000 earned run average and Bob Skinner's 330 bunting average if you're looking for reasons why the Pittsburgh Pirates look like the comeback kids of 1960.

ONE OF THE biggest disappointments of 1959, the Pirates lead the National League by one game today and their six-game winning streak equals the best this year. Furthermore, all but one In fact, it is only one game short of the longest streak any N.L. team achieved last season.

And there's no doubt that Law, a 30-year old 200-pound right-hander, and Skinner, a gangling 190-pound outfielder, have been the key reasons for the turnaround.

LAW TURNED in his third straight complete-game victory of the season and Skinner has been in two wins with a 2-0-2 performance Wednesday night when the Pirates shaded the Philadelphia Phillies, 3-2, to go one full game ahead of the idle San Francisco Giants.

In 27 innings this season, Law has yielded only 21 hits and three walked while striking out 113. He is 10-10 with a 3.99 record last season and looks this year like he could be a 20-game winner. Skinner, meanwhile, has collected 16 hits in 41 tries and knocked in 15 runs to establish himself as one of the League's most dangerous hitters.

DISCOUNTS TO STUDENTS

initial score. The greats of the past went 60 yards in 11 plays with Keith Hubbs and Felt luging the pigskin on short gainers off tackle.

Ron Starin sneaked the ball in from the one-yard line for the first score. Dick Felt's conversion kick was wide to leave the score at 6-0 at the half.

MCFARLANE turned a seesaw third quarter puntling duel into another score when he took a varsity punt on his own 43 and followed his interference for a touchdown gallop to increase the gap to 12-0. A pass conversion attempt fell incomplete.

Later in the same period the Cougars forced a punt in a winning situation on its own 15-yard stripe. But John Kaple and a host of white shirted Alumni linemen got in to block Gary Dunn's attempted boot and give the old-timer a safety and a 14-6 lead.

THE FINAL scoring play of the contest came on the last series of downs. The Alums got a punt on the varsity 32 and went in for another score in seven plays. Felt hit off left guard for the final score, and with Ralph Powers kicking the pat.

The Alumni had 12 first downs to 10 for the varsity while the Cougars lost two fumbles compared to one for the returning seniors.

Starting tackle Ron Nielsen suffered a knee injury during the opening play of the game. Coach Tally Stevens, while not certain, was inclined to think that the injury would not prove too serious.

WILLIAM SWALLER, the other returning tackle letterman, broke two ribs in an auto accident earlier in the week.

With both Nielsen and Vowaller missing, Stevens was forced to use freshmen at the tackle spots in the game. Many of the big gains for the Alumni game came off tackle stints.

The four interceptions by the varsity indicates that the Cougars may be somewhat stronger in the defensive secondary next fall.

The game was the final day of workouts for the Cats who open their 1960 schedule against Cal Poly on Sept. 17 in Provo before school's in session. The following week they travel to San Jose State.

Net Coach Re-Sets Invitational Meet For Play Next Week

Tennis matches that were rained out at last week's Invitational Meet at Brigham Young University have been re-scheduled for next week.

BUCK Dixon, chairman of the Invitational tennis tournament, said the class "B" high school finals and class "A" high school seniors and class "A" high school juniors will be held on the BYU courts Monday beginning at 3 p.m.

The junior college tennis matches which were also rained out have been scheduled for 11 a.m. Saturday, May 7.

Dixon said champions would be determined in the playoffs and the usual medals awarded.

GRID GAIN—BYU quarterback No. 10 runs back an intercepted pass in last night's Alumni game. Alumni players pursuing Dunn are No. 48 Raynor Pierce,

No. 72 Ralph Powers and No. 43 Ray Oliverson. The Alums used talent as their big weapon as they downed the varsity 21-0 in a game played on soggy field.

Sports

Nurses Snare Third Crown

The Student Nurse basketball team of Brigham Young University scored first place in the Student Nurse Association League for the third year in a row this year to gain the permanent possession of the traveling trophy.

The team consists of eight student nurses, four of whom are seniors. Team members are Phyllis Alphin, Louise Frost, Norma Hansen, Margaret Huber, Carolyn Lake, Bonnie Larson, Jane Parks, and Gwen Tufts.

Dickens May Lose Job, Violates Recruiting Code

BLOOMINGTON, Ind., April 28.—(UPI)—Phil Dickens of Indiana may be the first prominent football coach to lose his job in 1960 as a result of his school's new recruiting scandal.

Dickens, who sat out a year-long suspension in Hoosier football coach in 1957 for violating the recruiting code, said yesterday's action by the NCAA was a "damn, burned shame."

DICKENS DENIED he or any of his staff was guilty of wrongdoing in obtaining players despite the NCAA move and a parallel investigation into recruiting irregularities by the Big Ten.

It appeared that Dickens may become the victim of well-meaning Hoosier alumni who sought to boost Indiana into the football limelight.

PERSONALLY guilty or not, Dickens' future appeared shaky. A Big Ten regulation or recruiting puts in jeopardy the employment of a staff member.

It also threatens the offending school with suspension of its members or expulsion from the conference for failure to correct abuses.

SHULTON

Cougar Politics

by Jddy LeVar

Surprise! You believe in extending educational aid to veterans of cold wars."

MONDAY EVENING the ASBYU Senate adopted a resolution supporting the veterans legislation before Congress, the National Students Association requested them to do, means that when NSA lobbies for the bill, it will say at the students of Brigham Young University (as well as other schools) favor the measure. (Too bad Senate resolutions are not subject to veto by the studentbody president.)

Now what would have happened if the Senate had failed to pass the resolution? Would NSA have listed BYU among schools who opposed the measure, when lobbying?

Or would NSA merely take BYU off the list of supporting institutions, and leave it at that? In other words, can a member school actively oppose its' politics, or would the opposition be only passive?

This question should be thoroughly checked by student deans. Especially since the president-elect's program includes making BYU's voice heard regardless if it disagrees with NSA leaders. (The question still exists as to whether student Senate stands actually reflect the thinking of the studentbody.)

NOW WHAT ABOUT other NSA political moves? At present it is actively supporting the sitdown strikers in the UU. Campus committees are being set up across the nation (not at BYU) to collect funds for defraying expenses incurred by protesting negroes. (All collections are sent to Philadelphia for disbursement.)

Other policies which NSA advocates, in the name of its member schools, include opposition to disclaimer affidavits, loyalty oaths, opposition to firing college professors for membership in Communist Party, opposition to southern legal efforts to evade integration (calling them "subterfuges" to "around the Constitution"), and favoring Washington's full use of resources to extend federal aid to education (but failing to call federal aid a "subterfuge" to get around the Constitution.)

To my knowledge, NSA has said nothing about Castro's time. A delegation was sent to Cuba, but this was after its 1st congress (where stands are taken). Apparently, the coup returned in favor of Castro, however.

Now when the association was organized, it was to serve students, viz., compare curriculums, promote student exchanges, arrange foreign travel at a discount, etc. It is significant that last week Studentbody President Rex Lee said UU has gotten a lot of good from the NSA regional functions. (Regional activities would be "service" not "political.")

Mr. Korea' Appears headed for Farm Now

United Press International
"Youngman Rhee is 'Mr. Korea' most of the world.
He is the only president the public of Korea has known or it was born 12 years ago. Now, under pressure of friends & foes alike, the tough, 65-year-old Rhee, appeared headed for the farm.

THE OLD man, one of the world's staunchest anti-Communists, might have retired a champion had he quit as he said he would in 1956. But he could not find another chance—and then another...

Rhee was born March 26, 1875, in Wando Province, sixth and only son in six generations. His birthplace, just west of the 38th Parallel, is in communist hands—a source of row and shame to the president.

Rhee was named Yi Seung-nam and later westernized it. HE ATTENDED a Methodist

mission school in Seoul and English was his first language. He joined the Independence Club which urged reforms under the monarchy in the hermit kingdom and founded and edited Korea's first daily newspaper, the Matyi Shinmin (Daily News).

Rhee led a student demonstration—an irony upon which he must have reflected during these last wild days—in 1897 and immediately was imprisoned by the Royalists who tortured him for six months.

To Meet Youth's Needs...

BYU, Junior High to Hold Handicap Conclave

A conference on meeting the needs of the physically and mentally handicapped children and youth, which is sponsored by the Utah County Affiliate of the United Cerebral Palsy Foundation, Inc., will be held Friday evening and Saturday in the Central Junior High School and

Brigham Young University.

The Friday session will begin at 6 p.m. It is for all community members who have an interest in helping to meet the needs of handicapped children either from a personal or professional standpoint.

The Saturday session at BYU

is for school administrators, nurses, persons engaged in Special Education, social workers and representatives or organizations for handicapped persons.

Principal speaker at the conference will be Godfrey D. Stevens

Beatniks Bring New Art, Culture

by Don Mullen

United Press International

SAN FRANCISCO—(UPI)—The fuzz and the squares are making the whole North Beach scene a drag for the beat generation these days, man.

Translated into conformist talk, Daddies—that means the police and the townspeople infiltrated the hallowed boudoirs of San Francisco's upper Grant Avenue where the beards, boogies and babe-filled leotards held once-relied rights.

THE BEATNICKS are still cool, though. They're just too tired to sip a beer or a cup of espresso and stare blithely into space in peace. If the fuzz aren't trying to book somebody on a vagrancy charge, the squares from Nowhere, U.S.A. are shuffling up in their people clothes trying to take pictures.

And to compound the woes of the anti-materialistic set, the owners of the arts shops and bars are being corrupted by possibly... The squares keep bringing fistfuls of bill (8 money) on their jaunts around the edge of Telegraph Hill. Since the owners normally dig bread, they are stocking up on all sorts of snorey things, like "piano" pianos, self-painted oil oil painting kits and paper towels in the lavatories.

IT'S WIGGING the whole movement, man.

Like for example, the original

headquarters of the beat generation, The Place, has folded. The far-out proclamations of "Blabbermouth Night," when anyone could climb up to the balcony and proclaim the abominable, and the beat poet professed got a thing the best professed got a echo in the minds of a few.

ERIK (Big Daddy) Nord, once the father-confessor of North Beach, has been 86'd (barred from the place). The fuzz also closed the workshop, painted and where for a week one could bring a jug of red wine and mambo an impromptu bongo band from midnight to 4 a.m.

THE BREAD and wine mission has just been closed for six months. The mission, as opposite of the "beans for hymns" ar-

angement, may not reopen after its founder gets back from a much-needed vacation.

Congregational minister Pierre Delatre, who in the last year has been his best to start many an aspiring artist and writer working in his field, said quite a few of the talented beats are moving away from North Beach no longer sitting in on beat affairs.

MISSION kept religion well in the background. It offered a place where one could read his poetry aloud, exhibit paintings, use the printing press, take advantage of the well-stocked library with everything from St. Thomas Aquinas to Sade, or just sit around and sip coffee.

Delatre, in his working clothes of sweatshirt and khakis, was often mistaken for one of his followers. He admits there are many artistically-ambitious beatniks who have used the facilities of the mission, adding that phonies—"the spiritually dead and the culturally stagnant"—were growing beards and slipping on sandals and outwearing the beatniks.

AND TO TOP it off, Paddy (Padre S e a m u s) O'Sullivan, poet and roving landmark in North Beach, has shaved off his wild mustache and goatee, doffed his 17th century plumed hat and cape and started to wear square clothes.

But don't let the above bug you, Clyde. The co-existence bagel shop and the coffee galley—the kitchen and living room of the beatniks—was swinging. Painting and photography exhibits, poetry and essay readings and the weird riffs of modern jazz are still regular, though attractions.

YOU'VE got enough bread to buy a round of beer, and the ability to not alienate the inhabitants, you can still find somebody who will discuss Zen Buddhism, existentialism, outer space or the aesthetic appreciation of sex.

THAT IS, if you can fight your way through the fuzz and the squares.

OH, YES—and then too, hey you can still run across chicks in the old black leotards, black tunics, sweaters and long black hair who will sink up to you, give you a sleeve-on once-over and say:

"Hey, man—you got 25 cents? I have to pay the rent before 9 p.m. Make you feel all warm and mushy inside."

3. A world affairs editor to be in charge of increasing student awareness of what is happening in the outside world, including obtaining interpretive articles on world affairs by faculty members and qualified students.

4. A new asphalt plant has been established.

5. Forty acres of land was purchased for a garage, shops, and administrative offices, all paid for—have been erected.

6. There was a \$250,000 deficit, but it has been decreased now without the raising of a mill levy, and employees' wages have been raised.

GOP Hopeful For Governor Will Give Talk

Lamont Gunderson, Republican candidate for governor of Utah, will speak to the Young Republican League of Brigham Young University.

The meeting, which is open to the public, will be held in 2201 Smith Family Living Center at 7:30 p.m. Tuesday.

During Gunderson's eight years as a commissioner, his administration has accomplished "outstanding" things, according to John Flynn, historian of the Republican Club of Utah.

He listed the following items:

1. New seven year system was put throughout the county.

2. At the beginning of his administration there were 1000 miles of roads in disrepair and now the county has 1700 miles of roads in fair-to-good condition.

3. Three new fire stations, equipped with up-to-date equipment, have been built.

4. A new asphalt plant has been established.

5. Forty acres of land was purchased for a garage, shops, and administrative offices, all paid for—have been erected.

6. There was a \$250,000 deficit, but it has been decreased now without the raising of a mill levy, and employees' wages have been raised.

New Universe Editor Plans Many Changes

by Neil Flinders
University Staff Writer

The organizational structure of the Daily Universe is due to change, according to the newly-appointed editor for next year, Durston Harvey.

Harvey is a 21-year-old senior from North Hollywood, Calif. He is a journalism major and will replace Larry Day as editor-in-chief of the campus newspaper.

IN ANSWER to a question concerning the function of the Daily Universe, he said, "The Universe has the function of... informing the student of campus activities... providing a glimpse of world affairs... and informing the campus community of academic, scientific and cultural achievements of the university." He added that entertainment is also an essential part of the college daily.

In his plans to fulfill this function, the new editor outlined several changes in the organization. Among these is his plan to appoint three new editors to the staff.

1. A SCIENCE editor to be in charge of gathering information and writing on science projects in academic, social and life sciences.

2. A culture editor to promote feature and news articles in the field.

3. A world affairs editor to be in charge of increasing student awareness of what is happening in the outside world, including obtaining interpretive articles on world affairs by faculty members and qualified students.

The new editor encourages all those interested in working on the newspaper to contact him at the Universe office. "Everybody is welcome for summer," he reported, "and we will take anyone who wants the experience."

The Summer Universe is a semi-weekly publication covering on-campus news only.
